& services **WWM Invent Counter**
instruction manual

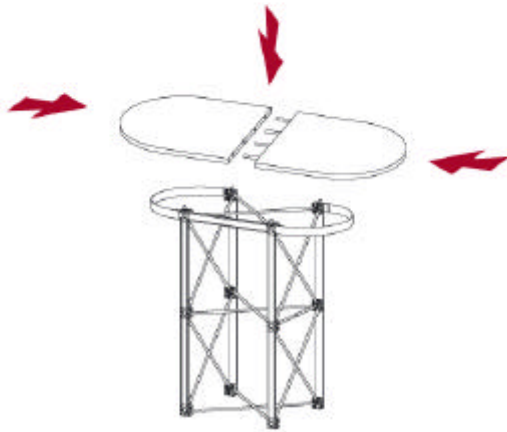

- Remove the structure from the packaging.
- Open the structure so that the 4 rods for attaching the top desk are at the top.

- Unwrap the magnetic bars and attach them to the magnets in the hubs. Fix the 180° magnetic bars to the side of the structure by inserting them into the hole in the hub, following the picture.
- The structure is ready for installing the graphics.

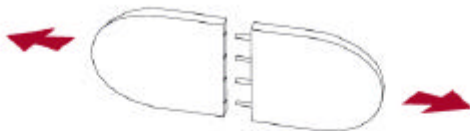

- If you are using shelves place them into the structure, so that the marked side is at the bottom.

WWM Invent CO21

- First complete the two parts of the top desk and then place the top desk onto the rods on the structure. (When dismantling, follow the picture)

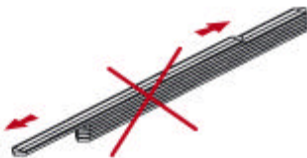

WWM Invent CO22

- Place the folded two-part top desk onto the rods on the structure and then unfold.

- It is advisable to allow the graphic panels to lie flat for about 30 min. before placing onto the structure
- To hang the graphic panels start with one of the middle panels and to finish place the two end cap panels.
- Always roll the graphic panels with the printed side outwards.

Never slide the magnetic bars on top of each other, it would damage the magnetic field!!!
